

MAPSA 2019: Title

First Name LastName¹

First Name LastName²

*¹Faculty Name,
University Name*

*²Faculty Name,
University Name*

¹Corresponding author's e-mail:[insert e-mail address here and remove brackets]

An abstract should be between 150 and 200 words typed with single spacing. Please note that the superscript for the second and subsequent authors are necessary only if they are not from the same institution as the first author. Make sure the abstract is in 12 Times New Roman, without indentation, and full-justified. The abstract should not contain any undefined abbreviations or unspecified references. The common elements of an abstract are: (1) an introduction to the research area covered by the manuscript, (2) the research justification for the manuscript, (3) the method used, (4) the results or findings, and (5) the conclusion or take home message. The abstract should be clear enough so that the reviewers can make a suitable recommendation (accept or reject) and assign it to the proper track. Therefore, please make sure the manuscript fits the scope of the conference. Upon acceptance, you then either submit a full paper (less than 6,000 words inclusive of references, tables and other materials) or a poster (A1 size). You are responsible to print the poster for presentation during the Congress. Please give three to five keywords that do not simply repeat the title.

Keywords: writing, template, APA, format, MAPSA
